Human Exposure / Adverse Effect Incidents Involving Monsanto Agricultural Products

Reporting Categories: H A, H B, H C

Reporting Period: August 1, 2018 – August 31, 2018

Substance:	Roundup Weed and Grass Killer Ready to Use III from Monsanto
Serial Number:	32491840
Date:	08/17/2018
Medical Outcome:	Major Effect H B
EPA Reg. No.	71995-33
Active Ingredients:	Glyphosate 2% Pelargonic Acid 2%
State:	Florida
History and Notes:	<p>Caller reports having used Roundup RTU about 3 months ago. Due to a wind shift she got the spray on her legs and feet. She was washed off right away with soap and water. About 6 hours later, the caller noted symptoms which continue to persist at this time. Caller reports a painful rash with blisters and now scars going up and down her legs. There is swelling and muscle cramping along with itching. Caller has used "everything" on her legs with no results. She has tried Benadryl but it does not work. Caller is "dying of kidney failure" so cannot be put on steroids. She denies diabetes. She has been to 2 different doctors, prescribed Tramadol for pain and an antibiotic but so far nothing has helped. MRPC discussed the product toxicity. Caller has not been seen by a dermatologist. MRPC advised caller to seek evaluation and treatment by a dermatologist and have them call the MRPC with any questions.</p> <p>Monsanto asserts that the alleged symptoms are not known effects of this product. However, they are known to be associated with the caller's other reported medical conditions.</p>
